

Expanded PTFE Gasket Sheet

Specification

- ❖ **EPTFE** (Expanded PTFE) is a Universal sheet gasket material for most services.
- ❖ Seals rough and irregular surfaces. Seals of up to 3000+psi can be achieved depending on the flange type & design and type of media being sealed.
- ❖ Suitable for temperatures to 600F.
- ❖ **EPTFE** is much softer and more flexible than regular PTFE sheet and thus conforms easily to irregular and rough surfaces. In addition, the material is easier to compress and minimizes creep and cold flow.
- ❖ **EPTFE** is an all purpose gasket sheet that can replace all other types of PTFE sheet.
- ❖ Made from 100% virgin PTFE, **EPTFE** not only resists chemical attack, but it will not contaminate or discolor end products.
